# DATA ANALYSIS (TASK 4)

**Project Title:** Data Dashboard Creation

**Task Description:**

Design and develop an interactive data dashboard for stakeholders to monitor key performance indicators (KPIs) or metrics.
- Responsibilities:
  - Identify relevant KPIs and data sources.
  - Choose a dashboarding tool (e.g., Tableau, Power BI, or custom web development).
  - Create interactive visualizations and reports.
  - Ensure data updates and refreshes in real-time or on a schedule.
  - Provide documentation and training for end-users.

**Skills Required:**
- Data visualization
- Dashboard design
- Data integration
- Dashboarding tools
- Programming skills (for custom solutions).
